Re:Letter of intent to construct 800 metres of road on RR440

To whom it may concern

Per direction of the MD of Bonnyville, Canadian Natural will construct 800 metres of undeveloped road allowance on Range Road 440 to minimum specifications of a class 5 as shown below figure. The 800 metres of new road development is on west side of sw7-61-3-w4m. The road build completion will take place only when Canadian Natural develops the Heavy Oil pad at 4-7-61-3-w4m. Canadian Natural will be responsible for all costs of building this road to the specs, the MD of Bonnyville is not required to provide funding. Canadian Natural will also ensure that the existing 800 metres developed road on west side of NW 7-61-3-w4m will be monitored for conformity and repairs completed if damages are done by Canadian Natural's Operations.
