

Dump the Dumpster!
Go **SUTERA** In-Ground!

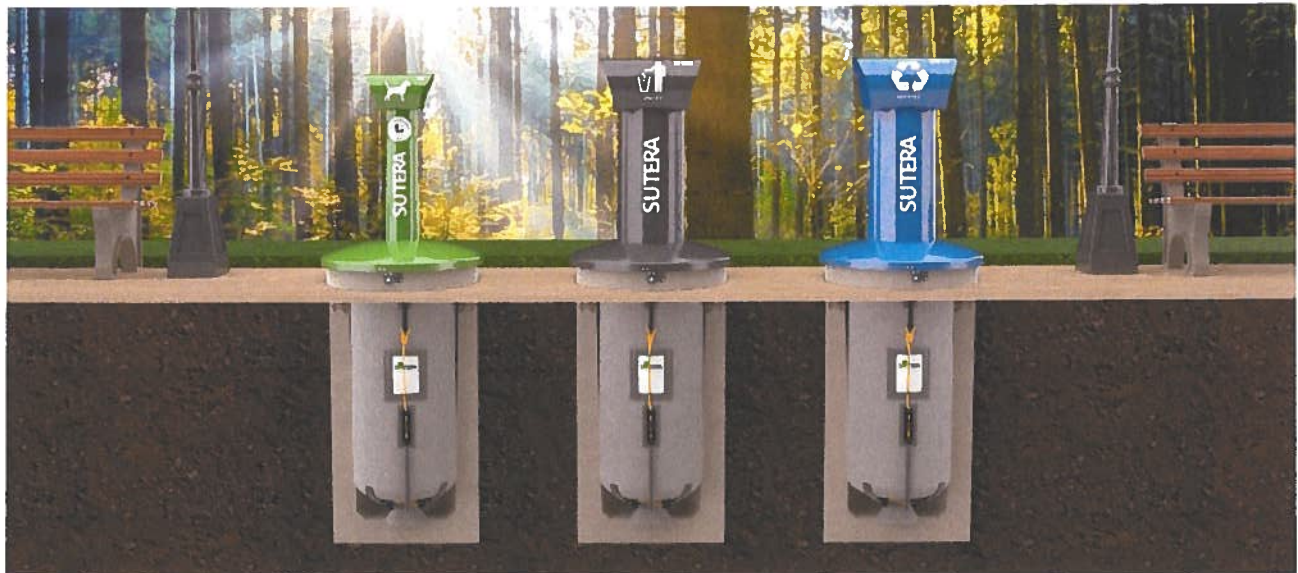

Municipal District of Bonnyville No. 87
Councillor Kalinski
4905 - 50 Avenue Bag 1010
Bonnyville, AB T9N 2J7

June 14, 2024

I am reaching out to introduce **SUTERA In-Ground**, a leader and innovator in the waste management industry. As a Canadian manufacturer and service provider, we specialize in managing large volumes of waste in small spaces using deep-well, in-ground containment, and vertical disposal methods.

Many cities like yours, including Waterloo, Mississauga, and Niagara Falls in Canada, as well as Portland, Greenville, and Columbia in the United States, have successfully leveraged our products and services for their waste, recycling, and compost management needs.

We are excited to announce that SUTERA In-Ground is now available in Alberta through our local partnership with WestX Earthworx Inc.

Let's Connect

We would like to schedule a brief, high-level conversation to explore how your municipality can also benefit from SUTERA In-Ground's proven cost-saving programs for CO₂ reduction and landfill diversion.

I will follow up shortly to arrange a convenient time for this discussion. In the meantime, please visit our website at www.sutera-inground.com for more information.

Thank you for your time and consideration.

Kind Regards,

Mike Kasij
Canadian Director of Business Development
