4525	█	█	█-HWY 892	2025-04-29 11:00	Brushing	Trees are dying on █ approach, █ would like a call back to discuss if this is our responsibility or █ before any action is taken.	Belongs to Alberta Transportation		2025-05-02	Ward 1
4524	█	█	445 N. Hwy 28 and near residence █-445	2025-04-29 10:54	Road Concerns	Road has been severely deteriorating since the oilfield traffic moved in recently. We did a quick repair last fall and it was good for the winter, but now it has thawed and the holes are coming back. There is 14 super-B Caltex trucks passing by daily and now TransCanada is installing a pipeline and wreaking havoc on the shoulders by pulling over so far for traffic, as well as moving alot of rig mats. Suggests we go check it out and track who is doing the damage so they can pay for repairs. States █ pays many taxes and is not getting much for them, road used to be excellent and used to have "no heavy trucks" signs.	We have road use agreements with both companies using the road. both companies know they will be paying for repairs. There is no new pipeline being installed, it is a hydrotest. Our repair last fall was to the structure using 6-80 gravel approx. 2' deep. It is structurAdmin sound, it's just the marginAdmin dry cold mix on surface that is breaking up. We will completed once all the failures have been identified.		2025-04-30	Ward 5
